

Maryland Patient Safety Center presents:
Patient Safety Tools Training
Root Cause Analysis

Thursday, April 6, 2023 • 8:00 am - 3:30 pm

Registration and Continental Breakfast begin at 8:00 am. Training will begin at 8:30 am. Lunch will be provided.

6820 Deerpath Road • Elkridge, MD • 410.540.9210

Program Overview

Healthcare organizations are constantly evolving because of changes in reimbursement, new technology, regulatory requirements, and staffing levels. These modifications cause policies and procedures to change often and in most cases, quickly. As a result, it is difficult to maintain consistency in processes and systems, which leads to variation. Often this variation results in increased failure risk. In this workshop, you will learn root cause analysis techniques to investigate those variances that cause near misses or sentinel events in order to minimize the possibility of future failures and thereby, improve care, treatment, and services provided by your organizations.

Learning Objectives

- Identify the processes that could benefit from root cause analysis
- Describe elements of a “thorough and credible” root cause analysis
- Apply analytical tools that identify and confirm root causes
- Identify strategies for developing action plans for improvement

Who Should Attend?

Patient safety coordinators, quality and performance improvement professionals, risk managers, and others who have responsibility for facilitation of Root Cause Analysis.

Program Fee

Non-members: \$299

Maryland Patient Safety Center members: **FREE**

About the Speaker:

Debra Illig, RN, MBA, CLNC, CPHQ, CPPS
Six Sigma Black Belt Professional

Debra Illig is the Vice President of Clinical Effectiveness and Patient Safety for Adventist HealthCare. Adventist HealthCare, based in Gaithersburg, Maryland employs more than 6,100 people and provides healthcare for more than 600,000 individuals in the community each year. Components of the health system include:

- Acute Care
- Ambulatory Care
- Behavioral Health
- Home Health
- Rehab

Throughout her career as a nurse executive, Debra has assumed leadership roles across the healthcare continuum. Her passion is hospice and palliative care.

Debra earned her MBA from Marymount University in Arlington, VA and her BSN from Indiana University of PA. She is a black belt in lean/six sigma with multiple certifications in healthcare quality, patient safety and legal nurse consulting. Debra is pursuing a Doctorate in Healthcare Administration.
